

KAIVALYA PATIL

Job Title – Python Full Stack Developer

Pune | +91 9049776225 | patilkevi6225@gmail.com | [LinkedIn](#)

Objectives

To work with an organisation that gives an opportunity to learn, grow and at the same time presents with chance to contribute towards the organisation growth.

Education

Institute	Course	Year of Passing	CGPA / Percentage
Sanjay Ghodawat University Kolhapur	Artificial Intelligence & Machine Learning Engineering	B-Tech - 2025	6.52
Dr. D. Y. Patil Polytechnic K.Bawada, Kolhapur	Computer Science	Diploma - 2021	79.60

Skills

- **Languages** - Python, SQL
- **Libraries**: Pandas, NumPy, Matplotlib, Seaborn
- **Framework**- Flask, Django, Django REST Framework (DRF)
- **Tools** – PyCharm, MySQL, Jupyter Notebook, Git, Visual Studio Code
- **Soft Skills** - Attention to Detail, Teamwork and Collaboration, Creativity, Patience and Perseverance, Learning Mindset

Internship

- **Intern** | Python Intern (Creazione Software) Pune |
20-06-2024 to 20-05-2025
 - Developed and deployed web applications using **Django, Django REST Framework (DRF)**.
 - Gained hands-on experience in **Python, HTML, CSS, Bootstrap, JavaScript**, and **MySQL**.
 - Built and integrated **RESTful APIs** for seamless backend communication.
 - Improved backend development skills, database management, and API integration.
- **Intern** | Python with Machine Learning in BrightGeeks Technologies Pvt. Ltd, Bengaluru |
05-01-2024 to 05-05-2024

Machine Learning Intern with hands-on experience in developing and testing machine learning algorithms, conducting research. Adept at data collection, preprocessing, model evaluation, and implementation. Proficiency in data collection and preprocessing using Pandas and NumPy. Skills in data visualization with Matplotlib and Seaborn.

Certificates

- Google Data Analytics. [\[certificate\]](#)
- Data Science & Machine Learning. [\[certificate\]](#)
- Introduction to Python. [\[certificate\]](#)
- Data Structures & Algorithms in Python. [\[certificate\]](#)
- Hacker Rank – Python (Basic)

Projects

Project name- Loan Prediction System (01/2024-05/2024)

- The aim of this project is to develop a web application that predicts loan eligibility based on user inputs such as gender, marital status, income, and loan amount. Using Python and Flask, the application processes these inputs, which are then converted into a Data Frame using Pandas. A pre-trained machine learning model, serialized with Pickle, is loaded to make predictions. The front-end is built using HTML/CSS, and Flask handles the dynamic content rendering. The model, trained on a loan eligibility dataset using algorithms like logistic regression or decision trees, is deployed in the web application to provide real-time predictions, which can be hosted locally or on a cloud platform for accessibility.

Project name- ChatBot Using ML (01/2024-05/2024)

- The aim of the ChatBot project is to develop an intelligent conversational agent that can interact with users, understand their queries, and provide relevant responses. This ChatBot is designed to assist users by answering questions, offering information, and automating routine tasks, all through natural language processing (NLP) techniques. The project leverages AI and machine learning to improve the ChatBot's ability to understand context, learn from interactions, and enhance user experience over time. This project is focused on understanding how a chatbot functions in real-time environments, providing insights into its practical applications and performance.

Project name- Driver Drowsiness Detection System (08/2023 - 06/2024)

- Developed a real-time drowsiness detection system using a Convolutional Neural Network (CNN) to enhance road safety. The system uses OpenCV for live video feed processing and Haar cascades to detect facial features (eyes and mouth). It predicts eye and mouth states (open/closed) using a trained CNN model and raises an alarm when prolonged drowsiness is detected. Key features include real-time monitoring, an intuitive visual interface, and an integrated alarm system for alerts.
Technologies used: Python, Keras, OpenCV, and Pygame.

Mobile: +91 967400000

EDUCATION

Vellore Institute of Technology	Bhopal, India
Master of Computer Application; GPA: 8.06	June 2022 - August 2024
Barasat Govt. College	Kolkata, India
Bachelor of Science (HONORS) - Mathematics; GPA: 8.70	June 2018 - August 2021

SKILLS SUMMARY

- Languages: Python, SQL, JAVA
- Frameworks: Pandas, Numpy, Scikit-Learn, Matplotlib
- Tools: Power BI, Excel, PowerPoint, Tableau, MySQL, SQLite
- Platforms: PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA
- Soft Skills: Rapport Building, Strong Stakeholder management, People Management, Excellent communication

WORK EXPERIENCE

BUSINESS ANALYST INTERN WS LINK	January 24- March 24
◦ Streamlined data collection and reporting procedures, reducing processing time by 20% enhancing efficiency. ◦ Implemented process improvements and automation solutions, resulting in 15% increase in productivity. ◦ Collaborated with 3+ cross-functional teams to gather requirements, define project scopes, and ensure alignment with business objectives, fostering effective teamwork and project success. ◦ Produced 15+ comprehensive reports and presentations summarizing findings and recommendations, facilitating clear communication with stakeholders and driving actionable outcomes. ◦ Conducted in-depth market research and analysis, resulting in the identification of 10+ key trends and insights that informed strategic decision-making processes.	

PROJECTS

Student Performance Prediction LINK	December 23- February 2024
◦ Achieved a 96% accuracy rate in forecasting student academic performance by developing and deploying a machine learning model. ◦ Managed data integrity by handling missing values and encoding categorical variables, enhancing quality by 33%. ◦ Conducted experiments with both classification and regression algorithms to identify the most suitable approach. ◦ Identified and comprehended key factors influencing academic performance through thorough analysis.	
Credit Card Fraud Detection LINK	September 23- October 2023
◦ Developed and fine-tuned a logistic regression-based machine learning model achieving an 87% accuracy rate in predicting credit card fraud. ◦ Minimized false positives by 16% through rigorous feature engineering and hyperparameter tuning processes. ◦ Implemented under-sampling and ensemble techniques to address class imbalance, leading to 15% improved performance. ◦ Successfully mitigated fraudulent transactions while optimizing model efficiency by 23% and accuracy by 6%.	
Heart Disease Prediction LINK	July 23- August 2023
◦ Orchestrated the development of a Logit model to predict heart disease, achieving an impressive accuracy rate of 91% and surpassing industry benchmarks. ◦ Spearheaded the implementation of HIPAA-compliant data encryption protocols across all healthcare solutions, decreasing data breach incidents by 40% and ensuring patient privacy and security. ◦ Demonstrated commitment to ethical data practices while contributing to the development of data-driven healthcare solutions. ◦ Enhanced healthcare outcomes by 26% through accurate prediction of heart disease, positively impacting patient well-being.	

CERTIFICATES

Programming in Python (Meta) CERTIFICATE	March 2023
◦ Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures. ◦ Acquired expertise in procedural programming paradigms and associated logical concepts, enhancing capabilities.	
Introduction to Data Analyst (IBM) CERTIFICATE	March 2023
◦ Learned about the data ecosystem, including the ETL process and big data basics. ◦ Mastered data gathering, identification, and cleaning for analysis preparation.	
Foundations: Data, Data, Everywhere(Google) CERTIFICATE	March 2023
◦ Developed a comprehensive understanding of the data life cycle and various stages involved in the data analysis. ◦ Introduced to diverse applications designed to streamline and optimize the data analysis journey, enhancing efficiency and accuracy.
