

Kaivalya Patil

Data Analyst

Pune, India | +91 9049776225 | patilkevi6225@gmail.com | [LinkedIn](#)

Professional Summary

Data Analyst with hands-on experience in Python, SQL, and data visualization using Power BI and Tableau. Skilled in data cleaning, analysis, and building insights-driven dashboards. Experienced in working with databases and integrating data pipelines for real-world applications. Seeking a structured and growth-oriented organization to contribute to data-driven decision-making and business impact.

Technical Skills

- **Programming:** Python, SQL
 - **Data Libraries:** Pandas, NumPy, Matplotlib, Seaborn
 - **Visualization:** Power BI, Tableau
 - **Frameworks:** Flask, Django, Django REST Framework
 - **Databases & Tools:** MySQL, Jupyter Notebook, Git, PyCharm, VS Code
 - **Core Strengths:** Analytical Thinking, Problem Solving, Clear Communication
-

Professional Experience

Data Analyst – Quantumsoft Technology

Aug 2025 – Present - As a Data Analyst, I analyze business data using Python and SQL to uncover patterns and generate actionable insights that support decision-making. I design, build, and maintain interactive Power BI dashboards for stakeholders, ensuring timely and accurate reporting. My role involves cleaning, validating, and transforming raw data to maintain high data quality and consistency. I work closely with cross-functional teams to understand requirements and deliver data-driven solutions, while also handling ad-hoc analysis and automating recurring reporting workflows to improve efficiency.

Python Intern – Creazione Software, Pune

Jun 2024 – May 2025 - During my internship, I worked extensively with structured datasets using Python and SQL for efficient data processing and analysis. I built backend pipelines using MySQL to store, retrieve, and manage data reliably. I performed data cleaning and transformation with Pandas to prepare datasets for analytics and machine learning workflows. Additionally, I integrated REST APIs with databases to support data-driven application features and collaborated with team members to debug issues and improve overall data handling efficiency.

Machine Learning Intern – BrightGeeks Technologies Pvt. Ltd., Bengaluru

Jan 2024 – May 2024 - I collected, cleaned, and preprocessed datasets using Pandas and NumPy to ensure data readiness for analysis and modeling. I assisted in training and evaluating machine learning models for classification tasks, contributing to performance improvements. To interpret results effectively, I created visualizations using Matplotlib and Seaborn to analyze trends and model behavior. This role provided me with practical exposure to the complete end-to-end data workflow, from raw data to actionable insights.

Projects

Loan Prediction System

- Built a Flask-based web application for loan eligibility prediction using a trained ML model.
- Preprocessed user inputs with Pandas and generated real-time predictions.
- Technologies: Python, Pandas, Flask, Scikit-learn, HTML/CSS.

ML-Based ChatBot

- Developed an NLP-driven chatbot to answer user queries using machine learning techniques.
- Implemented preprocessing and response logic for real-time interaction.
- Technologies: Python, NLP, ML, Pandas.

Driver Drowsiness Detection System

- Developed a real-time drowsiness detection system using CNN and OpenCV.
 - Processed live video feed and triggered alerts for prolonged eye closure.
 - Technologies: Python, Keras, OpenCV, Pygame.
-

Education

B.Tech – Artificial Intelligence & Machine Learning

Sanjay Ghodawat University, Kolhapur | 2025 | CGPA: 6.52

Diploma – Computer Science

Dr. D. Y. Patil Polytechnic, Kolhapur | 2021 | 79.60%

Certifications

- Google Data Analytics [[Link](#)]
 - Data Science & Machine Learning [[Link](#)]
 - Introduction to Python [[Link](#)]
 - Data Structures & Algorithms in Python [[Link](#)]
 - HackerRank – Python (Basic)
-

Currently seeking a full-time Data Analyst opportunity in a structured and growth-oriented organization, with focus on Python, SQL, and business-driven analytics.
